Location:	WCR 10 & WCR 55

A motion was made by Tom Cope for approval of the biosolid renewal permits of Denali Water Solutions. Bree Lukens seconded the motion, and the motion was carried unanimously.

PRESENTATIONS: Katrina Alsum, Laboratory Manager presented Water Quality.
Lab samples and analyze municipal drinking water and private well water and wastewater. Some of the analyses for Municipal drinking water are Total Coliform/E. coli, nitrate, nitrate, nitrite, and fluoride, disinfection byproducts, lead and copper. They also analyze private well water for metals (uranium, sodium, arsenic, etc.), hardness, anions (chloride & sulfate), and VOCs.
Instrumentation lab has Bacteriological testing, wet chemistry, Ion chromatograph, ICPMS, GCMS/ECD, any testing that they don't have the adequate equipment is outsourced for testing.
This testing is done for municipalities regulated by state and private wells are not regulated.
Growing concerns include PFAS/Forever chemicals, microplastics, mobile home parks and landfills.
The lab is expected to obtain additional instrumentation such as certify GCMS/ECD and Add flow analyzer, more community work including grant applications, and partnerships.

Respectfully submitted,

Silvia Cerrillo
PH Office Tech Supervisor
Weld County Department of Public Health & Environment
