## COUNTY TO CONSIDER ADOPTION OF WCR 29 PLAN

The towns of Severance, Eaton, Ault, Pierce, and Nunn have adopted the Weld County Road 29 Access Control Plan (ACP), so it will now go before the Weld County Board of County Commissioners for consideration of adoption.

The main objective of this ACP is to provide safe access to properties on the Weld County Road 29 corridor between State Highway 392 and WCR 100, which can be accomplished through the following goals:

1. Improve corridor safety.
2. Coordinate construction improvements.
3. Promote economic vitality.
4. Protect infrastructure investments.

## PUBLIC INVITED

A public hearing regarding the WCR 29 ACP plan will occur on January 8 at 9:00 at the Weld County Administration Building located at 1150 O St., Greeley.

5. Maintain the functional integrity of the corridor (safety, mobility, and capacity).

To accomplish these goals, the ACP contains various requirements and policies for accesses and other matters relating to the road. The ACP states accesses that do not meet the criteria in the plan can remain as they are, but they should be addressed as soon as feasible, when development occurs, with change of use, or when the road is widened, whichever occurs sooner.

The ACP is intended to be used by Weld County Public Works staff when designing improvements on the corridor, by the towns as they annex portions of the road (the northernmost mile is already in the Town of Nunn), and by developers so that they will know the requirements for access onto the corridor. The ACP also contains a process for amending the plan in order for it to remain a "living document."

The Board of County Commissioners will hold a public hearing and consider adoption of the ACP at 9:00 a.m. on Monday, January 8, 2018 at its regular biweekly meeting.
